

KAYAK LAUNCH INSTRUCTIONS

BOARDING THE KAYAK

1. Tie your Kayak or paddle board to the ladder with a bungee or other rope and ensure that your craft is balanced lengthwise.
2. Crank the winch counter-clockwise to lower the craft and bunks below water surface.
3. Step down the ladder and into the kayak.
4. Holding on to the handrail and the ladder, climb aboard your craft.
5. Untie your craft. Hold the handrail and ladder and push off and begin paddling until craft is clear of the lift.

DISEMBARKING

1. While still a fair distance away from the lift, guide your craft to be in line with the bunks.
2. Paddle craft straight onto the bunks. Reach out to grab the handrail to bring the craft to rest, then secure with bungee or rope.
3. Exit your craft and climb the ladder back up onto the dock.
4. Crank the winch clockwise until lift is raised to dock level.
